

# TRAIL DIFFICULTY SCALE

PLEASE USE THE FOLLOWING GUIDE IN CONJUNCTION WITH OUR TRAIL GRADING INFORMATION

**NOTE: BLEND TRAILS START AT AN ADVANCED LEVEL OF RIDING**

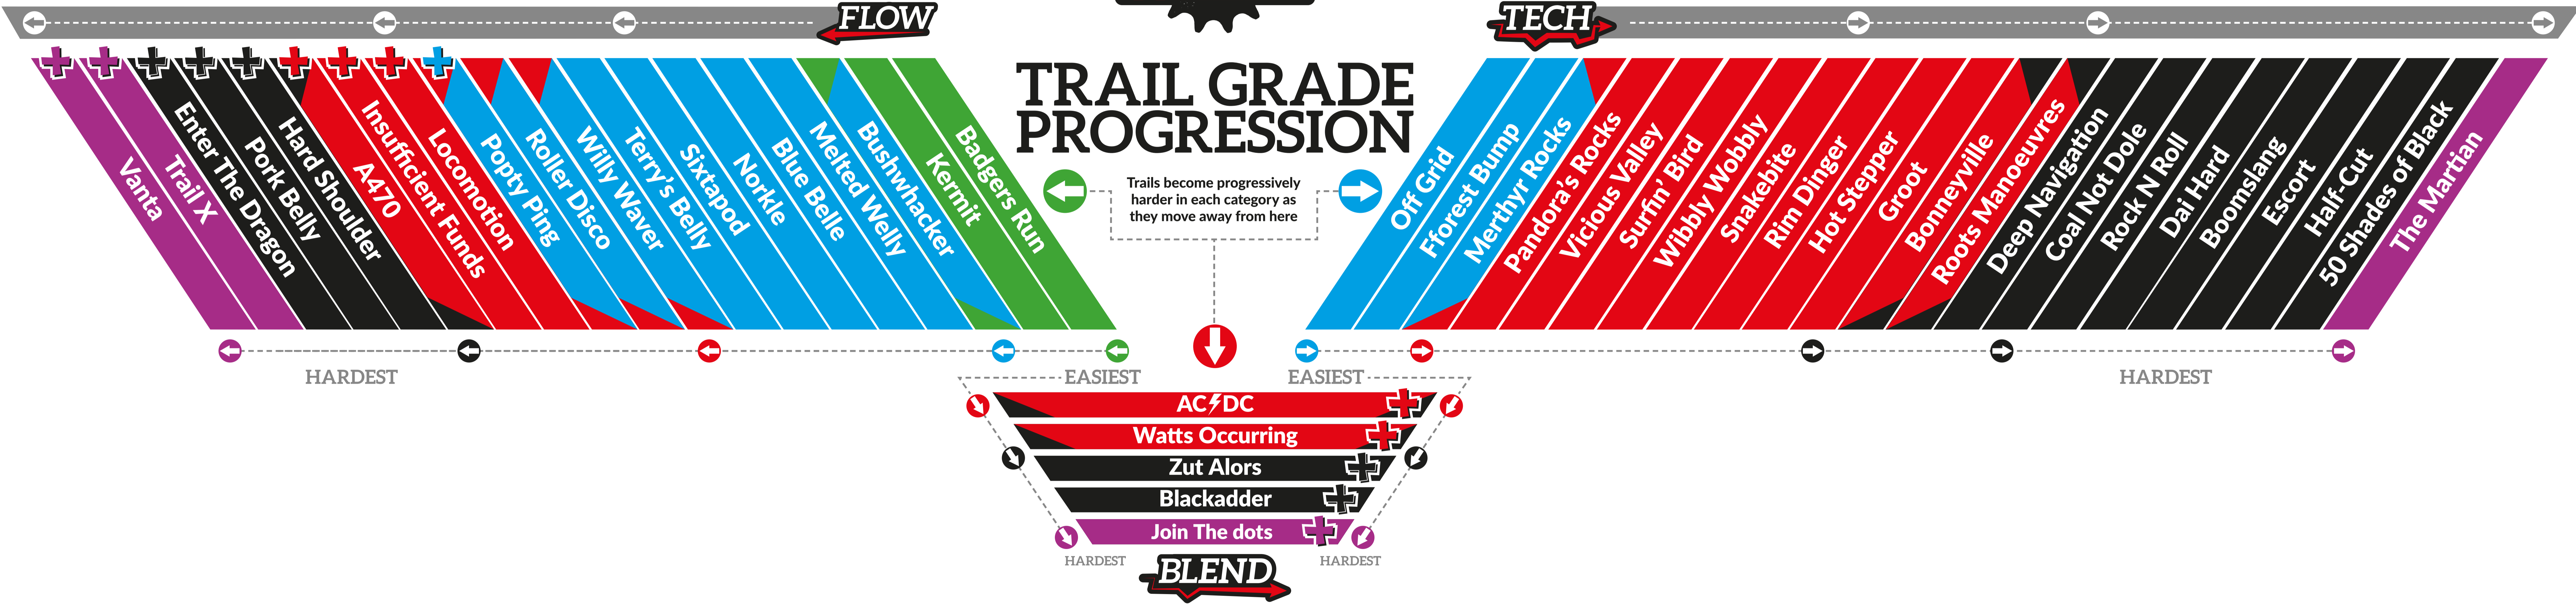

BPW FLOW TRAILS are created with smoother and typically wider trail surfaces and feature a high percentage of berms, jumps or pump features. Overall speeds are higher than those on BPW Tech Trails.

EASIEST TO HARDEST

EASIEST TO HARDEST

BPW TECH TRAILS have rougher and more natural trail surfaces featuring a high percentage of natural or organic features: rocks, roots, drops and steeper gradients. Speeds are generally lower than those on BPW Flow Trails.

BPW BLEND TRAILS contain a true mix of both Tech and Flow trail styles and features. Fast sections of berms and jumps are combined with tighter, steeper and technical riding to make the most varied trails in the park, suited to riders with a fully developed skillset.

This graphic is for use as a general guide only; some trails may be perceived to be more difficult than others by riders depending on their own riding strengths.
